

What is Tai Chi?

Tai chi is an internal martial art that combines philosophy, martial arts, well-being and self-awareness. Considered “moving meditation”, tai chi requires focusing the mind and synchronizing the body with slow, controlled movements. This low-impact exercise, practiced with relaxed muscles, improves natural posture alignment, balance and internal energy.

Why Learn Tai Chi?

Hour for hour, tai chi brings more benefits and enjoyment than most other exercises. It is an ancient art with great depth yet requiring no special equipment. People of any age or physical condition can gain increasingly better health and enjoyment. It is even fun and can be practiced alone or in a group.

What's more important, tai chi helps you to like yourself more, which, in turn, leads not only to better health, but also harmony within yourself and with others.

Tai chi is non competitive, non judgmental- a wonderful activity for all ages- making it an ideal way of socializing and sharing time.

Tai chi is based on nature. Its gentle flowing movements contain an inner power which strengthens the body and mind. Those who practice tai chi become like a tree or river, calm on the outside, but full of internal strength, more capable of withstanding whatever life may throw their way.

Scientific studies show that the practice of tai chi not only improves, but also prevents almost all chronic conditions including arthritis, heart disease and diabetes. In addition, it improves balance, immunity, and reduces stress. In fact, tai chi improves practically every aspect of health.

Today there are good reasons why tai chi is practiced in every corner of the world for health improvement.
